It is fine to send all of this to them if only to inform the subsequent discussion we have with them. The main goal was to highlight to SRC that there are potential data sources/pubs (i.e., the bibliography) that they seemingly did not catch or did catch but did not consider. I want to be sure that in moving forward with this one that our ultimate bibliography is as comprehensive as humanly possible. Thanks

Jason,

Not to beat a dead horse but we actually have 4 documents total in regard to P-CBSA. Confirming that you want all 4 shared with SRC. Thanks.

Teresa,

Attached are the documents you requested. The original request came with two documents. I have attached both.

Additionally, we sent two responses to this request, which are also attached. The first response, sent 4/30/15, is the review of the documents. The second response, sent 8/18/15, explains the feasibility of developing a PPRTV for p-CBSA. Both responses were sent to Daniel Stralka (Region 9) and cc'ed Michael Scozzafava (original requestor).

Please let us know if you need anything else.

Thanks,
Jacki

Can someone send me the document that we reviewed for CalEPA on this chemical and also Jason's response to them? Thanks.
